Substitute True Copy of Claims

Serial No. 09/774,275

TC 1700SUB E
Claim 75

A reclosable bag for filling with at least one food product, said reclosable bag comprising: at least one sheet of web material including at least two areas of structural weakness, having at least one fold structure located between and defined by said two areas of structural weakness, and an opening located generally opposite said fold structure; a reclosable fastener structure including a skirt structure of skirt web material extending therefrom; said skirt structure including a distal margin; said distal margin being coupled to said web material at, at least one location between said areas of structural weakness and said opening; said reclosable fastener structure extending past said areas of structural weakness; said reclosable bag capable of being filled with at least one food product through said opening.

Claim 76

The reclosable bag of claim 75 wherein said reclosable fastener structure extends over said fold structure.

Claim 77

The reclosable bag of claim 75 wherein the skirt web material is integral to the reclosable fastener structure.

Claim 78

The reclosable bag of claim 75 wherein the skirt web material is coupled to the reclosable fastener structure.

Claim 79

The reclosable bag of claim 75 wherein the web material includes an outside surface and an inside surface; the inside surface including a predetermined area having a releasable adhesive material thereon; whereby a peelable seal may be formed.

Claim 80

The reclosable bag of claim 79 wherein the peelable seal, when formed, is hermetic.

Claim 81

The reclosable bag of claim 75 wherein said web material of said reclosable bag is substantially comprised of a sheet of a parent film material having predetermined dimensions.

Claim 82

The parent film material of claim 81 wherein the areas of structural weakness are integral to said parent film.

Claim 83

The reclosable bag of claim 75 wherein said areas of structural weakness extend linearly across a predetermined dimension of said sheet of web material.

Claim 84

The reclosable bag of claim 83 wherein the predetermined dimension is width.

Claim 85

The reclosable bag of claim 83 wherein the predetermined dimension is length.

Claim 86

The reclosable bag of claim 75 wherein said areas of structural weakness extend nonlinearly across a predetermined dimension of said sheet of said web material.

Claim 87

The reclosable bag of claim 86 wherein the predetermined dimension is width.

Claim 88

The reclosable bag of claim 86 wherein the predetermined dimension is length.

Claim 89

The reclosable bag of claim 75 wherein said areas of structural weakness extend across a predetermined dimension of said sheet of web material in a predetermined pattern.

Claim 90

The reclosable bag of claim 75 wherein said areas of structural weakness comprise perforations.

Claim 91

The reclosable bag of claim 75 wherein said areas of structural weakness comprise scoring.

Claim 92

The reclosable bag of claim 75 wherein said areas of structural weakness comprise microperforations.

Claim 93

The reclosable bag of claim 75 wherein said sheet of web material is comprised of a multiple laminate film.

Claim 94

The reclosable bag of claim 93 wherein said multiple laminate film includes at least one layer of material comprising a tear path.

Claim 95

The reclosable bag of claim 94 wherein said tear path is hermetic.

Claim 96

A reclosable bag for filling with at least one food product, said reclosable bag comprising: at least one sheet of web material including at least two areas of structural weakness, having at least one fold structure located between and defined by said two areas of structural weakness, and an opening located generally opposite said fold structure; a reclosable fastener structure including a skirt structure of skirt web material extending therefrom; said skirt structure including a distal margin; said distal margin being coupled to said web material at, at least one location between said areas of structural weakness and said opening; said reclosable fastener structure extending past said areas of structural weakness and over said fold structure; said reclosable bag capable of being filled with at least one food product through said opening.

Claim 97

The reclosable bag of claim 96 wherein the skirt web material is integral to the reclosable fastener structure.

Claim 98

The reclosable bag of claim 96 wherein the skirt web material is coupled to the reclosable fastener structure.

Claim 99

The reclosable bag of claim 96 wherein the web material includes an outside surface and an inside surface; the inside surface including a predetermined area having a releasable adhesive material thereon; whereby a peelable seal may be formed.

Claim 100

The reclosable bag of claim 99 wherein the peelable seal, when formed, is hermetic.

Claim 101

The reclosable bag of claim 96 wherein said web material of said reclosable bag is substantially comprised of a sheet of a parent film material having predetermined dimensions.

Claim 102

The parent film material of claim 101 wherein the areas of structural weakness are integral to said parent film.

Claim 103

The reclosable bag of claim 96 wherein said areas of structural weakness extend linearly across a predetermined dimension of said sheet of web material.

Claim 104

The reclosable bag of claim 103 wherein the predetermined dimension is width.

Claim 105

The reclosable bag of claim 103 wherein the predetermined dimension is length.

Claim 106

The reclosable bag of claim 96 wherein said areas of structural weakness extend nonlinearly across a predetermined dimension of said sheet of said web material.

Claim 107

The reclosable bag of claim 106 wherein the predetermined dimension is width.

Claim 108

The reclosable bag of claim 106 wherein the predetermined dimension is length.

Claim 109

The reclosable bag of claim 96 wherein said areas of structural weakness extend across a predetermined dimension of said sheet of web material in a predetermined pattern.

Claim 110

The reclosable bag of claim 96 wherein said areas of structural weakness comprise perforations.

Claim 111

The reclosable bag of claim 96 wherein said areas of structural weakness comprise scoring.

Claim 112

The reclosable bag of claim 96 wherein said areas of structural weakness comprise microperforations.

Claim 113

The reclosable bag of claim 96 wherein said sheet of web material is comprised of a multiple laminate film.

Claim 114

The reclosable bag of claim 113 wherein said multiple laminate film includes at least one layer of material comprising a tear path.

Claim 115

The reclosable bag of claim 114 wherein said tear path is hermetic.

Claim 116

A reclosable bag for filling with at least one food product, said reclosable bag comprising: at least one sheet of web material, at least one tear tape structure, at least one fold structure, and an opening located generally opposite said fold structure; a reclosable fastener structure including at least one

integral skirt structure of skirt web material extending therefrom; said integral skirt structure including at least one distal margin; said distal margin being coupled to said web material at, at least one location between said tear tape structure and said opening; said reclosable fastener structure extending past said tear tape structure and over said fold structure; said reclosable bag capable of being filled with at least one food product.

Claim 117

D A reclosable bag for filling with at least one food product, said reclosable bag comprising: at least one sheet of web material including at least one predetermined tear area, at least one fold structure, and an opening located generally opposite said fold structure; a reclosable fastener structure including at least one integral skirt structure of skirt web material extending therefrom; said integral skirt structure including at least one distal margin; said distal margin being coupled to said web material at, at least one location between said tear area and said opening; said reclosable fastener structure extending past said tear area and over said fold structure; said reclosable bag capable of being filled with at least one food product.
